## Creating Public Value

- What does it mean to create public value in a world where cross-sector collaboration is need to address most important public problems?
- What are the appropriate frameworks, disciplinary sources of ideas, and analytics needed to figure out or discern what public value is or might be in specific circumstances?

## The Need to Focus on Processes

- **Processes as:**
  - embedded in contexts
  - “assemblies”
  - requiring participative acts
  - triggers of social mechanisms
- **The crucial role of artifacts**
- **The importance of technologies**

## Putting It All Together

- Frameworks
- Processes
- Tools and Techniques
- Cases – and the changing notion of “cases”
